

UNICREDIT SME ALTERNATIVE DATA INTELLIGENCE ENGINE

Deterministic, Explainable, and Compliant by Design

- Deterministic and rule-based scoring
- Fully coded in Python
- Compliant public alternative data
- AI optional and non-influential

"Structures fragmented public alternative data into a deterministic, explainable SME intelligence layer."

FROM SCREENING TOOL TO INTELLIGENCE LAYER

**Not automating credit decisions—
enabling structured SME intelligence
for commercial prioritization and early
risk awareness.**

4-pillar scoring framework

Risk classification

ESG footprint detection

Product opportunity mapping

Portfolio prioritization capability

SYSTEM ARCHITECTURE

MODULAR PYTHON ARCHITECTURE

Built for flexibility and scale, ensuring the system remains robust and maintainable.

NO BLACK-BOX ML

Deterministic logic ensures explainability, critical for regulated banking environments.

EACH LAYER AUDITABLE

Full transparency at every step of the data processing pipeline.

EASILY EXTENDABLE

Seamlessly integrate with licensed APIs to enhance data richness.

SINGLE SME INTELLIGENCE

4-pillar breakdown

Scoring range 0–100

ESG footprint proxy

Sustainability indicators

SME size proxy

Estimated scale

Confidence level

Data reliability score

Risk severity logic

LOW / MEDIUM / HIGH

Sector classification

Industry categorization

Governance maturity

Compliance indicator

Suggested Products

Tailored UniCredit offers

Opportunity vs Risk matrix

Strategic positioning visualization

"Not just scoring—contextualizes each SME within commercial and risk decision support."

PORTFOLIO INTELLIGENCE

CSV upload

Seamless data ingestion

Automatic batch scoring

Process thousands of SMEs instantly

Ranking by opportunity

Prioritize high-potential clients

Risk distribution view

Portfolio-wide risk assessment

Sector clustering

Industry-based analysis

Opportunity vs Risk quadrant

Strategic portfolio mapping

" Relationship managers prioritize portfolios systematically instead of manual case-by-case review.

TOP OPPORTUNITIES

Company Name	Sector	Score	Action
TechNova Solutions	IT Services	92	CONTACT
GreenLeaf Logistics	Transport	88	CONTACT
Urban Retail Grp	Retail	74	REVIEW

PORTFOLIO DISTRIBUTION

Score trend tracking

Historical analysis of performance over time

Risk escalation detection

Automated alerts for negative signal spikes

Confidence level analysis

Data reliability assessment per entity

ESG penetration rate

Sustainability metrics integration

Peer benchmarking

Comparative analysis against sector averages

Downloadable JSON & PDF reports

Exportable intelligence for offline review

"Evolves into a monitoring engine, not a one-off assessment."

QUANTIFIED BUSINESS IMPACT

OPERATIONAL EFFICIENCY

- ~30 minutes saved per SME pre-analysis
- 200 SMEs/year per RM → **~100 hours saved**
- Scaled across network → significant FTE impact

COMMERCIAL PRIORITIZATION

- % SMEs classified as high-opportunity
- % multi-product potential (B2B + Intl + E-commerce)
- Improved first-meeting targeting

RISK EARLY WARNING

- % portfolio flagged for adverse signals
- Risk density across SME segments
- ESG × Risk classification distribution

PORTFOLIO INTELLIGENCE KPI

- Average portfolio score
- Opportunity concentration ratio
- Sector-level performance

WHY THIS MATTERS

STRUCTURED SME PRIORITIZATION

Systematic ranking of opportunities replaces manual guesswork.

INCREASED COMMERCIAL EFFICIENCY

Optimizing relationship manager time for high-value interactions.

EARLY RISK AWARENESS

Proactive identification of potential issues before they escalate.

ESG PORTFOLIO VISIBILITY

Clear insight into sustainability metrics across the client base.

FULLY COMPLIANT ARCHITECTURE

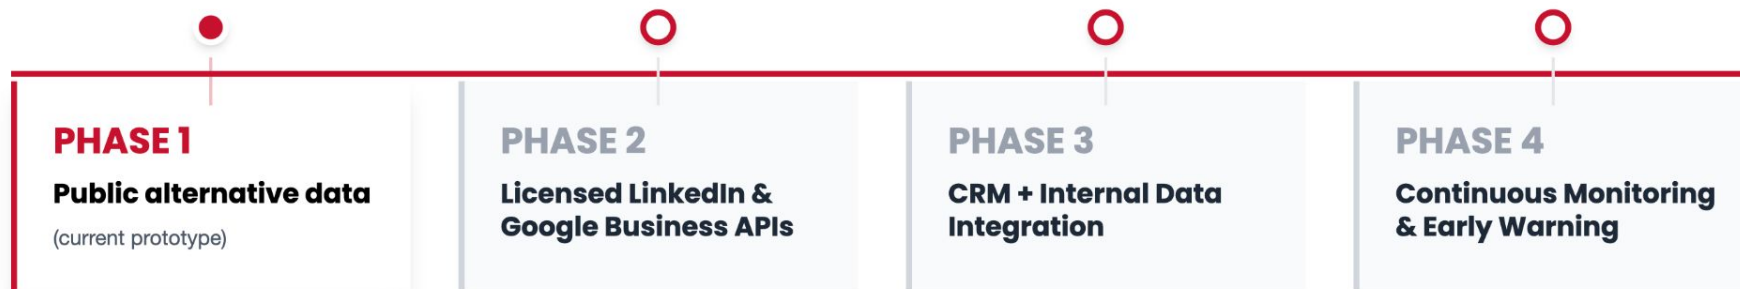

Built from the ground up to meet strict banking regulations.

SCALABLE ACROSS REGIONS

Modular design allows rapid deployment to new markets.

ROADMAP TO PRODUCTION

**THIS IS NOT JUST A SCREENING TOOL.
IT IS THE FOUNDATION OF A COMPLIANT SME INTELLIGENCE
PLATFORM.**

THANK YOU
